SOLUTION BRIEF

Secure, Connected Learning for Schools and Colleges

School systems balance student safety, privacy, learning access, and instructional continuity with small technology teams spread across many campuses. BlueAlly connects secure networks, collaboration, identity, data, and managed support around the school day, so districts and institutions modernize with less disruption and clearer value.

Key industry challenges

Funding cycles: Network plans have to fit E-Rate and budget timelines.

Student data & safety: FERPA, identity protection, and Microsoft 365 security across students and staff.

Flat, exposed networks: Large districts need segmentation to contain threats and avoid campus-wide outages.

Small teams, many schools: Limited staff to run security, operations, and projects together.

Fragmented data: Educators need timely, trustworthy views of student progress.

SOLUTION BRIEF

How BlueAlly helps

Network & Collaboration: E-Rate-aligned wired and wireless refreshes, segmentation, and cloud-managed operations.

Cybersecurity & Compliance: Microsoft 365 security assessments, remediation, and ongoing protection through AllyCare.

Data & AI: Reporting that connects district, school, classroom, and student data.

Integration Center: Pre-staged equipment that turns refresh weekends into installs.

Proof

Secure Score to 81%: A district serving 170,000+ students and staff more than doubled its Microsoft Secure Score and put its A5 licenses to work.

120+ schools: A district of 70,000+ students segmented its network to contain threats and remove single points of failure.

131 devices, one view: A district used E-Rate funding to replace disconnected platforms with one cloud-managed network.

36 schools in 5 months: Houston County Schools connected reporting for more than 30,000 students.

24/7 access: Morehouse College moved email and collaboration to Microsoft 365.

Why BlueAlly

Experience across K-12 districts, colleges, and universities; E-Rate-aware planning; 24x7x365 managed support from BlueAlly employees.
