SOLUTION BRIEF

Secure, Mission-Ready IT for Federal Agencies

Federal missions demand modernization that never compromises security. BlueAlly brings 20+ years of experience supporting Department of War, federal civilian, and federal systems integrator communities, aligning infrastructure, cybersecurity, data, networking, and collaboration to mission objectives in high-security environments.

Key industry challenges

Security & compliance at every layer: Zero Trust, STIG, FIPS, CMMC, and classified handling requirements.

Distributed operations: Hundreds of sites, training centers, and offices that need consistent, reliable service.

Aging infrastructure: End-of-life networks, storage, and voice platforms that put availability at risk.

Manual operations: Network changes and validation that consume engineering time and introduce error.

Procurement friction: Agencies need partners they can buy from quickly.

SOLUTION BRIEF

How BlueAlly helps

Network & Collaboration: Network modernization, automation, and secure unified communications across nationwide footprints.

Cloud & Infrastructure: Classified and unclassified cloud storage, data protection, and data center refresh.

Cybersecurity & Compliance: Zero Trust, CMMC readiness, and controls aligned to federal requirements.

Mission transport & AI: Next Generation Black Core and private, on-premises AI for federal environments.

Easy procurement: Contract vehicles including GSA MAS and 2GIT.

Proof

Under 5 minutes: Automated site validation, down from as much as 50 minutes, saved 10 to 17 engineering hours a month with ROI in under a year.

500+ offices: A federal organization connected Washington and nationwide offices on one collaboration platform in 18 months.

100% data protection: A U.S. Air Force organization reached a 100 percent data protection success rate across 13 locations.

125 training centers: A federal training agency refreshed core infrastructure to improve reliability and performance.

Classified cloud: A Department of Defense organization gained secure cloud capacity for classified cold data with familiar access.

Why BlueAlly

Top Secret facility clearance; 24x7x365 operations staffed by BlueAlly employees; one team from strategy through managed operations.
